COMPANY BACKGROUNDER

EVER POWER

Residential energy infrastructure for the AI era

EverPower.AI is building the residential energy infrastructure required for the AI era. Founded in 2017 and headquartered in Scottsdale, Arizona, the group is a vertically integrated residential energy-AI platform that delivers full home energy independence — bringing technology, installation, and financing together under a single roof.

THE OPPORTUNITY

The power grid is entering its most demanding decade in a century. The rapid build-out of AI datacenters, accelerating electrification, and increasingly volatile load patterns are straining utilities in exactly the regions where demand is growing fastest. Meeting that demand with centralized generation alone is slow, costly, and carbon-intensive — while the homes already connected to the grid represent an underused source of flexible capacity, the last mile of energy.

THE MODEL

EverPower.AI works in close partnership with utilities to provide targeted demand relief, node stabilization, and peak-load support where grids are most constrained. Through an AI-driven framework, surplus residential capacity and equivalent utility relief can reinforce the grid as a locationally optimized resource, delivered precisely where and when it is needed.

Because the group is vertically integrated, it owns the full journey to home energy independence: the core technology that runs the systems, the sales and installation channels that put them in homes, and the finance and insurance products that make them affordable and protected. That integration is what turns individual battery-backed homes into a coordinated, grid-scale resource.

THE PLATFORM

Nine wholly-owned subsidiaries, organized across three integrated pillars.

CORE TECHNOLOGY

Oreqa
Core clean-energy technology — low-carbon production and distributed-energy systems.

EHMA
The AI-powered conversational commerce platform for home power systems.

EyeTech
Empowering people to communicate, control, and live independently.

SALES & INSTALLATION

Hello Green Home
Move-in ready homes with built-in battery-backed power.

Suntria
Trusted energy consultants and installers, serving homes across America.

EcoNest
A 12-month path for pre-qualified buyers to own a battery-backed home.

FINANCE & INSURANCE

HelloLend
Smart mortgages and loans for battery-backed home upgrades.

HelloEnergy
A simple monthly plan for a battery-backed, self-powered home.

BetterWatts Insurance
Protection and peace of mind for battery-backed homes.

REACH, BACKING & LEADERSHIP

The EverPower.AI Group is equity-backed by Finaventures and operates across multiple states — Arizona, Texas, Florida, Oklahoma, Kansas, Missouri, Ohio, Michigan, Pennsylvania, Utah, California, Oregon, Washington, and Idaho — with more than 700 employees spanning engineering, product, installation, service, finance, and multi-channel sales.

ABOUT EVERPOWER.AI — BOILERPLATE

Founded in 2017 and headquartered in Scottsdale, Arizona, EverPower.AI is a vertically integrated residential energy-AI platform delivering full home energy independence. Working in close partnership with utilities, the company provides targeted demand relief, node stabilization, and peak-load support in regions strained by AI datacenters, electrification, and volatile load — turning surplus residential capacity into a locationally optimized grid resource through its AI-driven framework. Equity-backed by Finaventures, the EverPower.AI Group operates across multiple states with 700+ employees and nine wholly-owned subsidiaries spanning core technology, sales and installation, and finance and insurance.
