EVER POWER

CORPORATE OVERVIEW

RESIDENTIAL ENERGY INFRASTRUCTURE FOR THE AI ERA.

2017	700+	9
FOUNDED	EMPLOYEES	SUBSIDIARIES

Equity-backed by Finaventures

THE MOMENT · 01

THE GRID IS FACING ITS HARDEST DECADE IN A CENTURY.

01

AI DATACENTERS

Explosive compute demand is concentrating new load on specific grid nodes, faster than supply can follow.

02

ELECTRIFICATION

Vehicles, heating, and industry are shifting to electricity, lifting baseline demand across every region.

03

VOLATILE LOAD

Peaks are sharper and less predictable, straining utilities exactly where growth is fastest.

Meeting this with centralized generation alone is **slow, costly, and carbon-intensive.**

THE HOMES ALREADY ON THE GRID ARE THE LAST MILE OF ENERGY.

EverPower.AI turns underused residential capacity into a coordinated, grid-scale resource — delivering full home energy independence while reinforcing the grid where it is needed most.

A VERTICALLY INTEGRATED RESIDENTIAL ENERGY-AI PLATFORM.

EverPower.AI partners closely with utilities, providing targeted support where grids are most constrained.

DEMAND RELIEF

Reducing load on constrained networks during periods of peak stress.

NODE STABILIZATION

Strengthening specific grid nodes where new demand concentrates.

PEAK-LOAD SUPPORT

Adding flexible capacity precisely when and where it is needed.

AN AI-DRIVEN FRAMEWORK, OPTIMIZED BY LOCATION.

1

DISTRIBUTED CAPACITY

Battery-backed homes across multiple states create surplus, flexible energy capacity.

2

AI COORDINATION

An AI-driven framework matches that capacity to grid needs in real time.

3

OPTIMIZED RELIEF

Equivalent utility relief is delivered exactly where and when the grid needs it.

THE PLATFORM · 05

NINE SUBSIDIARIES, THREE INTEGRATED PILLARS.

CORE TECHNOLOGY

Oreqa

Core clean-energy technology.

EHMA

AI-powered conversational commerce for home power.

EyeTech

Communicate, control, and live independently.

SALES & INSTALLATION

Hello Green Home

Move-in ready homes with battery-backed power.

Suntria

Trusted energy consultants and installers.

EcoNest

A 12-month path to own a battery-backed home.

FINANCE & INSURANCE

HelloLend

Smart mortgages and loans for home upgrades.

HelloEnergy

A simple monthly plan for a self-powered home.

BetterWatts

Protection and peace of mind for battery homes.

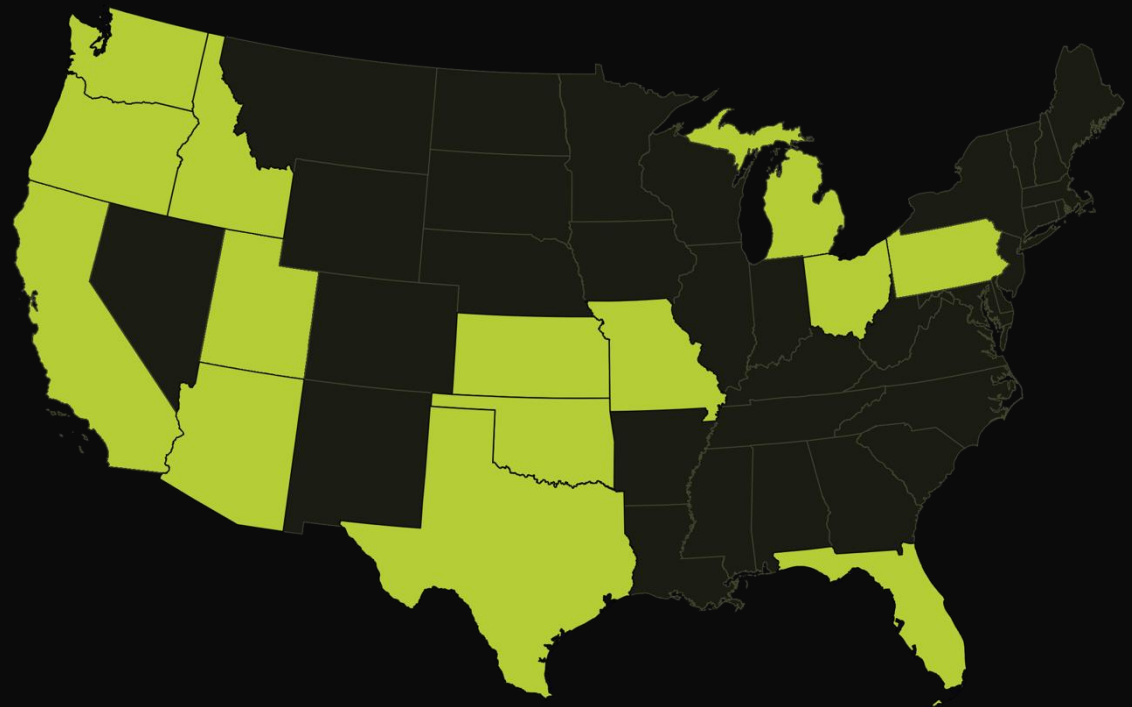

SCALE & FOOTPRINT · 06

BUILT TO OPERATE AT GRID SCALE.

2017
FOUNDED

700+
EMPLOYEES

9
WHOLLY-OWNED SUBSIDIARIES

OPERATING ACROSS

Arizona · Texas · Florida · Oklahoma · Kansas · Missouri · Ohio · Michigan
Pennsylvania · Utah · California · Oregon · Washington · Idaho

LEADERSHIP · 07

LED BY OPERATORS FROM ENERGY, FINANCE, AND TECHNOLOGY.

ONE PLATFORM, TWO SIDES OF THE METER.

FOR HOMEOWNERS

Full home energy independence

Move-in ready, battery-backed power

Simple financing, mortgages, and insurance

Protection and peace of mind

FOR UTILITIES & THE GRID

Targeted demand relief where it's needed

Node stabilization and peak-load support

Locationally optimized, AI-coordinated capacity

A faster, cleaner path to resilience

EVER POWER

FULL HOME ENERGY INDEPENDENCE.
